Project: 820160 Mathilda Avenue Traffic Signal Controller Replacement

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 1998-99 Ongoing Staff	Type: Phase: % Complete:	Street & Traffic Ongoing n/a	Signals	Department: Project Manager: Project Coordina Interdependencie	Hira tor: Jack	
Element: Sub-Element:	1 Land Use and Transportation none		Goal: Neighborhood:	1.C3.1, 1.C3.3, 1 : City Wide		und: ub-Fund:	610 Infrastructure Renov & Replace : 100 General Fund Assets

Statement of Need

This project provides for the replacement of aging traffic signal controllers/coordination equipment on Mathilda Avenue from El Camino Real to Ahwanee/Almanor Avenues. The new coordination equipment is compatible with other arterial systems for Sunnyvale Saratoga Road and Fair Oaks Avenue. The estimated life of the new controllers is 10 years.

Service Level

This project will replace the traffic signal controllers/interconnect system on Mathilda Avenue from El Camino Real to Ahwanee/Almanor Avenues. The existing equipment has reached the end of its useful life and is in need of replacement.

Issues

This is the City match for the TFCA grant 820161 Central Sunnyvale Arterial Management project. This project is currently under construction and should be completed within the next few months.

Project: 820180 Traffic Signal Controller Replacement

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 1998-99 Ongoing Staff	Type: Phase: % Complete:	Street & Traffic Ongoing n/a	Signals	Department: Project Manager: Project Coordinat Interdependencies	tor: Dennis Ng
Element: Sub-Element:	1 Land Use and Transportation none		Goal: Neighborhood:	1.C3.1, 1.C3.3, 1 City Wide		Fund: 610 Infrastructure Renov & Replace Sub-Fund: 100 General Fund Assets

Statement of Need

This project provides for the replacement of traffic signal controllers at the end of their estimated useful life. Traffic signal controllers are all solid state. Controllers will require replacement at approximately 15-20 year intervals due to obsolescence or changes in functionality. Pending upgrades include Evelyn/Frances, Pastoria/Washington, Bernardo/Heatherstone, Bernardo/Washington.

Service Level

This project will improve traffic flow at intersections by allowing the newer and more advanced features of traffic signal controllers to be put into place throughout the city as they become available. In addition, it will increase the reliability of the City's signal control equipment, thereby reducing its liability exposure.

Issues

This project provides for the replacement of traffic signal controllers throughout the City as they reach the end of their useful lives. These computer-based controllers deteriorate with time and replacement parts become difficult to find as the equipment is phased out of manufacture.

Project: 820190 Traffic Signal Underground Replacement

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 1998-99 Ongoing Staff	Type: Phase: % Complete:	Street & Traffic Ongoing n/a	Signals	Department: Project Manager Project Coordina Interdependencie	:: Hira ator: Deni	_	
Element: Sub-Element:	1 Land Use and Transportation none		Goal: Neighborhood:	1.C3.1, 1.C3.3, 1 City Wide		Fund: Sub-Fund:		Infrastructure Renov & Replace General Fund Assets

Statement of Need

This project provides for the replacement of traffic signal underground conduits and structures at the end of their estimated life span. Underground cables and conduits have a life expectancy of 20 - 40 years with an average of 35 years. Pending installations include Washington/Pastoria, Evelyn/Frances, Fair Oaks/Kifer, Fair Oaks/Wolfe, Wolfe/Arques, and Sunnyvale-Saratoga/Fremont. In FY 2002/2003, Mathilda/Ahwanee, Mathilda, Maude, and Wolfe/Old S.F. installations were completed.

Service Level

This project will help to minimize the inconvenience to the traveling public when underground signal facilities begin to fail, by having the means to deal with them already in place.

Issues

This project provides for the replacement of underground traffic signal conduit and conductors as they reach the end of their useful life. If not replaced, the repairs and downtime of traffic signals could be significantly affected. Life cycles vary from 20 – 40 years depending on the type of materials used. Many of our signals have now reached the end of the life cycle.

Project: 820200 Traffic Signal Light Emitting Diode Array Replacements

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 1997-98 Ongoing Staff	Type: Phase: % Complete:	Street & Traffic Ongoing n/a	Signals	Project Manager: Project Coordinator:	Public Works Hira Raina Dennis Ng none
Element: Sub-Element:	1 Land Use and Transportation none		Goal: Neighborhood:	1.C3.3, 1.C3.4 : City Wide	Fund: Sub-F	610 Infrastructure Renov & Replace Fund: 100 General Fund Assets

Statement of Need

This project funds replacement of the red traffic signal light emitting diode arrays (LED) as they approach the end of their useful life. The LEDs are warranted for seven years. It is expected that 15% of the installed LED arrays will need to be replaced annually. The LED arrays result in a significant savings to the City in power consumption and annual replacement costs. This project will be increased when the green signal LED arrays and pedestrian crossing indicators are added to the system.

Service Level

This project will replace the Light Emitting Diode lights used for traffic signals. The expected lifetime of these lights is 7-10 years and it is anticipated that 15% of these lights will need to be replaced per year beginning in FY 2004/05 fiscal year. The previous incandescent lights that were used were replaced every 1-2 years.

Issues

None.

Project: 822710 Mathilda Avenue Railroad Overpass Improvements

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 2001-02 2004-05 Staff	Type: Phase: % Complete:	Street & Traffic Design 5	Signals	Department: Project Manager: Project Coordinator: Interdependencies:	
Element: Sub-Element:	1 Land Use and Transportation none		Goal: Neighborhood	1.C3.1 : City Wide	Fund Sub-	d: 385 Capital Projects -Fund: 600 Gas Tax Funded

Statement of Need

The existing bridge has been rated below standard by CalTrans. The project will provide widening and possible reconstruction of a portion of the bridge to improve traffic for Mathilda Avenue and Evelyn Avenue. This project is subject to 80% reimbursement from State/Federal funds. Funding has been granted for preliminary engineering, and is anticipated for construction.

Service Level

This project will upgrade/replace the Mathilda Avenue Bridge over the CALTRAIN line. This structure has been rated by CALTRANS as obsolete due to existing conditions that do not meet current design standards. The project will correct these deficiencies and add a southbound to eastbound connection to Evelyn Avenue and the Downtown area. The project is funded by a Federal grant to pay for 80% of the total project costs.

Issues

Project revenues are reimbursed based on actual costs incurred.
